

Quick Start Guide

SMS - 920 / 930

Sign Making System

Safety Instructions

When set up correctly and installed according to instructions, the printer should not present any hazards.

The following possible dangers exist:

- Injury from the cutter assembly.
- Hair, clothes and jewellery pulled into the printer, during operation with the cover open
- Only use the printer in protected environments.
- Do not spill any liquids into the printer.
- Only have your printer repaired by specially trained service personnel.
- In any event of danger or damage to the printer, turn the printer off and remove from the power supply..
- Turn the printer off and remove from the power supply before cleaning.

Technical Information

General Specifications

Specification	SMS - 920 / 930
Print Technology	Thermal transfer
Resolution	300 dpi (12 dots/mm)
Print speed	5-15cm/sec (2-6 Inch/s)
Print length	127cm (50 inch)
Print width	21,5cm
Memory	8 MB Flash memory 32 MB SDRAM
CPU type	32-bit high performance processor
Sensors	Transmissive/ gap sensor (position adjustable from 4" ~ 8") Reflective black mark sensor (position full web adjustable) Transmissive ribbon end sensor Ribbon encoder sensor Head open sensor
LCD Display	Graphic type, 128 x 64 pixel, with back light
Operator interface	6 operation buttons
Communicatie interface	USB - Centronics parallel (LPT) – 100Mbit Network port
Fonts	Internal character sets. 5 alfa numeric fonts from 1,25mm~6,0mm All fonts can be scaled 24x24 4 rotation positions 0°-90°-180°-270° Soft fonts can be downloaded.
2D Barcodes	Maxicode, PDF-417, Data Matrix
Wiegth	23.2kg
Power	Input: 90-264VAC, 47-63Hz
Classifications	CE, UL, CUL, FCC class A, CCC
Operating environment	Operation: 5°C ~ 40°C, 20% ~ 85% non-condensing

Quick Installation Guide

Printer Overview

Loading Ribbon

Loading Ribbon

		
<p>(1) Lift printer cover open. Push printhead release lever to open printhead mechanism.</p>	<p>(2) Install the ribbon and paper core onto ribbon supply spindle and ribbon rewind spindle.</p>	<p>(3) Thread ribbon through the ribbon sensor slot and printhead. Stick ribbon onto ribbon rewind paper core, keeping the ribbon flat and wrinkle-free.</p>
		<p>* Loading path for ribbon</p> 
<p>(4) Wind the ribbon rewind spindle clockwise roughly 3~5 circles until ribbon is smooth, properly stretched and wrinkle-free.</p>	<p>(5) Close the printhead mechanism, making sure the latches are engaged properly.</p>	

Control Panel

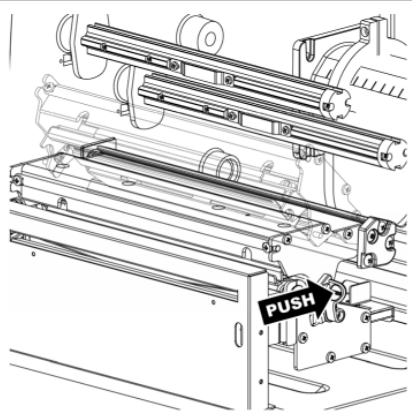

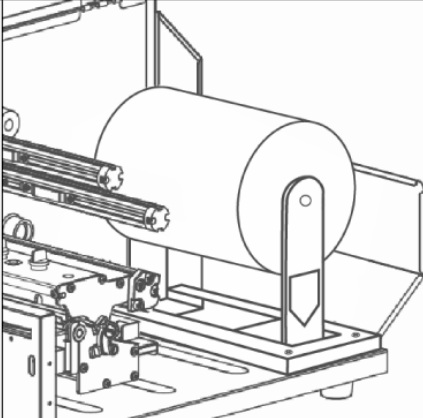

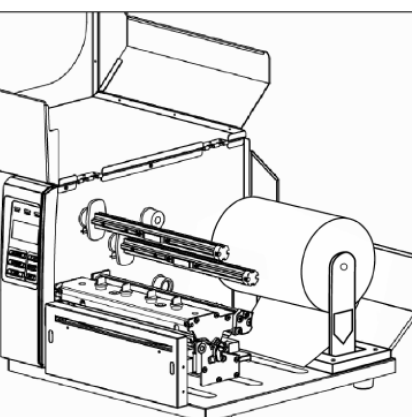

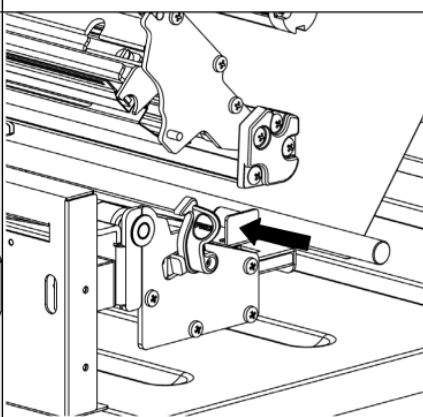

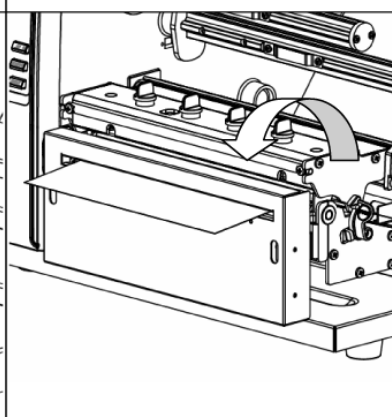

LED	Status	Indication
POWER	Off	Printer power off
	On	Printer power on
ON-LINE	On	Printer is ready
		Printer is paused
	Blinking	Printer is downloading data
ERROR	Off	Printer is ready
	On	Carriage open OR Cutter error
	Blinking	No paper, Paper jam OR No ribbon

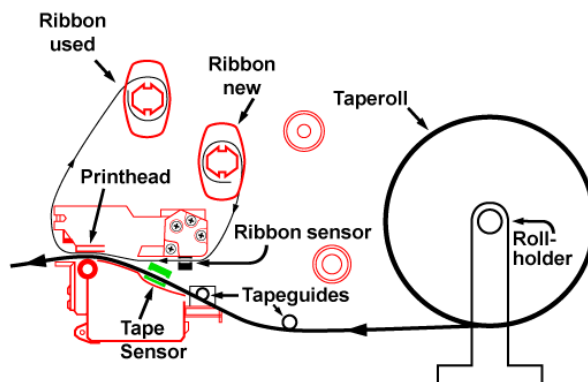

Keys	Function
MENU	1. Enter the menu system 2. Once in the menu system, return to previous menu. If at menu root, exits the menu system.
PAUSE	Pauses or resumes printing
FEED	Advances one label
UP	Scroll up the menu options
DOWN	Scroll down the menu options
SELECT	Select the currently highlighted option

Loading Media

Loading Media

 <p>A line drawing of the printhead mechanism. A lever on the right side is being pushed forward, indicated by a black arrow and the word "PUSH" in a black box.</p>	 <p>A line drawing showing a large roll of media being lifted by a vertical support. The rollguards are being moved outwards to create space for the new roll.</p>	
<p>(1) Push the printhead release lever to open the printhead mechanism.</p>	<p>(2) Lift the empty media roll up and move the rollguards wider. Place the new media roll.</p>	
 <p>A line drawing of the media roll with the leading edge of a label being pulled forward through a guide bar and onto a platen roller.</p>	 <p>A line drawing showing the label guide being adjusted to fit the width of the label. A black arrow points to the adjustment mechanism.</p>	 <p>A line drawing showing the printhead mechanism being closed. A black arrow points to the latches being engaged.</p>
<p>(3) Pull the leading edge of the label forward through the media guide bar past media sensor, and place the leading edge onto the platen roller</p>	<p>(4) Adjust the label guide to fit label width.</p>	<p>(5) Close printhead mechanism, making sure the latches are engaged properly.</p>

* Loading path for media

(6) Using the front display panel, set media sensor type and calibrate the selected sensor (See "Media Sensor Calibration" on facing page).

Note: Re-calibrate the gap/black-mark sensors when changing media.
